

CREDENTIALING

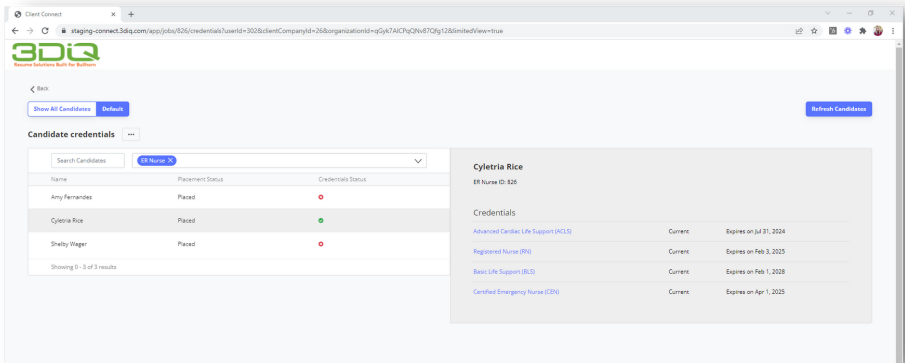

3DIQ Credentialing works seamlessly with Bullhorn Credential Files.

Give your clients a secure way to view required credential and certification documents for placed candidates or contractors.

3DIQ Credentialing allows clients to view all required credential for each placed candidate, including:

- The Credential Name
- Whether it is current or expired
- Date on which the Credential expires (if applicable)

Best for clients who are asking for credential or certification visibility, and aren't currently using a CRM or VMS to manage credentials currently

CREDENTIALING

3DIQ Credentials also works directly with our Client Portal, which means your clients can have a one-stop-shop for candidates from submission through placement.

3DIQ Credentialing is a solution for you if:

- You currently (or plan to) add credential requirements to your Jobs in Bullhorn
- Currently (or plan to) use the Credentials Files tab to store and manage Candidate Credentials or Certification documents
- Have a need to display Credential or Certification information, including documents, with Clients
